NOTE: As a guide, the results are based trading \$5 PIP's. These are the Beta test results on Kels trading account. Using strict money management by increasing the PIP size as the account increases in value will accelerate results over the long term . We recommend strict money management to obtain consistent long term results. Drawdown periods do occur and are part of any trading system method.

Disclaimer and Disclosure

Kel Butcher is an authorised representative (ASIC # 342049) of Romad Financial Services Pty Ltd AFSL 238032. 21st Century Forex Pty Ltd, ABN 39 128 729 644 is a CAR (ASIC # 362783) of Romad Financial Services Pty Ltd AFSL 238032. Kel Butcher and 21st Century Securities are Lincenced to provide advice on Deposit Products, Debentures, stocks or bonds issued or proposed to be issued by a government, Securities, Derivatives and Futures products, FOREX products. All advice is general deal only. Past performance is not an indication of future results. There is risk of loss trading Futures, Stocks , Derivatives or Forex.

21st Century Forex Pty Ltd declare that they deal in financial products as part of their business and consequently they may have a relevant interest in the financial products recommended herein and may earn fees from the recommendations. You should not act on any recommendation issued by 21st Century Securities Pty Ltd without first consulting your investment advisor in order to ascertain whether the recommendation (if any) is appropriate having regard to your investment objectives, financial situation and particular needs. We believe that the information and advice contained herein is correct at the time of compilation, however no warranty of accuracy or reliability or completeness is given to any advice or information contained in this publication and no responsibility for any loss or damage whatsoever arising in any way for any representation, act or omission, whether express or implied (including responsibility to any person by reason of negligence) is accepted by 21st Century Forex Pty Ltd, its directors, employees, agents and third party information providers. There is risk of loss trading Forex. Past performance does not imply futures results. On this page, you are going to read about trading systems and their performance. It's important that you understand that all results reported on these pages must be treated as hypothetical results whilst in the Beta Test Period.

Hypothetical performance results have many inherent limitations, some of which are described below. No representation is being made that any account will or is likely to achieve profits or losses similar to those shown. In fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk in actual trading. For example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program, which cannot be fully accounted for in the preparation of hypothetical performance results and all of which can adversely affect actual trading results, such as interruptions to trading execution because of technology malfunctions or other external factors beyond the control of the system providers.
